COMMUNITY PROGRESS PROGRAM

Mattapoisett residents who are taking an active part in the Community Progress Program being conducted by Fairhaven Grange for the Sears Foundation national contest are Mrs. Marjorie L. Morris, chairman, assisted by Miss Susan Wordell, lecturer.

First project undertaken was cleaning, brush cutting and tree-removal around the Grange Hall in which Paul A. Morris, the master, participated. Another beautification project will be the planting of two honey locust trees from the Morris farm on Arbor Day, April 30, at the new Fairhaven police and fire station building, with Jeffrey Brasor of Fairhaven, Grange Youth Committee chairman, in charge, assisted by Dale Harris, Sheila, Sharon, Robin and Rhonda Rusinoski of Mattapoisett.

Current and major project is the Teach and Learn School being held on Mondays at 7 P.M. at Fairhaven Grange Hall, with a special exhibition feature at each session. Mrs. Hazel B. Sylvia, son-in-law and daughter, Mr. and Mrs. Charles Tate, have exhibited rug-hooking; Mrs. Mary Helfand, machine-knitted sweaters; Mrs. Carrie Silveira, tray-painting and tin-decorating; and Miss Wordell's class in good grooming will appear in a style show. Miss Wordell, a graduate of Grace Downs Airline Hostess Training School in New York City, is instructing in poise, hair-care, manicuring and facials.

Enrollment in the school is free, with no cost except for materials, a social hour concludes each session, and visitors are welcome at all times. The program is adapted to any Grange but is not limited to Grangers.

If waves hit a deserted beach and no ear is there to listen, is there any sound of surf?

Isn't this an interesting question? Is there noise without a receiver to transform the sound waves into the brain waves that we call sound? This point can be argued both ways. No matter which side you take, if those waves were your advertising message, you'd rather have as many ears as possible on that beach. Only the Presto is sent to everyone. If you'd like your message to be received, we reach more people in our area than any other form of advertising.

Yours very truly,

FORECAST BOOM FOR MATTAPOISETT

Figures just released for the 1965 census reveal an unexpectedly accelerated growth period for Mattapoisett, according to Shurcliff and Merrill, the Town's long range planners. Census statistics show that the town has grown nearly twice as fast in the last five years as it did in the ten preceding, which in themselves were regarded as boom years. To be specific the census shows 2265 year round residents in 1950, 3117 in 1960 and 3942 today.

Mattapoisett, indicate that the area as a whole will increase only a modest 10% by 1980. However 10% for the entire area amounts to 15,000 persons. It is felt by Shurcliff and Merrill that Mattapoisett will get a lion's share of these families.

"Why should the newcomers seek out Mattapoisett for their homes?" David L. Young of Shurcliff and Merrill was asked. In reply he pointed out that Mattapoisett has a whole series of attractions to offer which, when put together, have a strong magnetic effect in comparison with the City of New Bedford or other nearby towns. For example, Mattapoisett has a nearly ideal seacoast location with valuable harbor and bathing facilities. It offers the charm of an historic New England atmosphere with plenty of lots available on existing or soon-to-be-constructed streets. This appeal is enhanced by present Town Zoning requirements which are far from stringent . Furthermore, within a decade, a new U. S. expressway will cross Mattapoisett, making the Town much more accessible than before for both the new suburbanites of this region and vacationers from many east coast urban areas.

Coming growth will bring many changes to Mattapoisett. During the next twenty-five years, the year-round population is expected to nearly triple and summer residents should almost double. These new and generally larger families will require that twice the present number of houses will have to be built, utilizing about 800 acres of new land. These newcomers will also need about twice the present amount of business area and as much new industry as can be persuaded to settle. To serve 1990 residents, Mattapoisett will have to provide well over three times the present school space, nearly double the existing water supply, public sewer service in the Village, several new connecting streets, more than triple the present beach space, a new Town Hall, a larger Public Library and a new Police Station, as well as substantial additions to its public harbor, park and recreation lands.

The Master Plan which has been developed over the last year and one-half by the Mattapoisett Planning Board and its Consultants is designed to locate and schedule this impending development in the best long range interests of the Town. To do so, this program stresses three basic objectives, as follows: 1. The Conservation of

Mattapoisett's Present Assets. This objective can be accomplished by limiting non-residential uses to only the best locations for them, by protecting historical areas from damaging changes and by acquiring public control of local wet lands, scenic areas, and needed beaches and park lands before development claims them. 2. The Controlled Development of New Public and Private Lands. By planning public improvements with relation to an overall service pattern and by requiring private development to work within the limitations set by this pattern, Mattapoisett can be reasonably assured of trouble free growth in future years. 3. The Stabilization of Future Town Finances. The advanced planning of municipal finances can do much to steady Town spending by anticipating new operating expenses, and forecasting the need for additional revenues.
